PORTFOLIO & CURRENT PROJECTS

- **Working on a hybrid application:** Tech stack includes: AWS, React Native
 - **Angular 6.1:** Created a todo application with delete option, html and css for buttons
 - **Modx Evolution and Revolution:** Able to create and maintain a website on platform use extras and work on database for storing chunks, templates, and snippets.
 - **Laravel Frameworks:** Created Laravel forms sending data to database and retrieving that data from database and putting on a webpage.
 - **Exposure to Magento 2:** Understanding of modules, templates and editing pages on frontend. Exposure to MVVM pattern, able to replicate, but editing others work comes with time.
-
- **I'm A Zombie** is a 2D game developed using the **Unity** cross-platform game engine which also uses C# language. To develop this game, I formed a team of three people in which I led and functioned as the overall programmer.
