OBJECTIVE

Adaptable and hard-working web developer graduate with proven leadership skills seeking a career in web development or a similar field. Developed a Tic-Tac-Toe and Zombie game, hair salon website for client, ecommerce site, twitter inspired site and personal website to showcase skills. Regular attendee of web developer meetups and game developer events.

TECHNICAL SKILLS

Certifications:

- Udemy Complete Java Developer Course
- AWS Certified Developer Associate
 - Validation Number: N91CCFCBNE41SWM
 - Validate at: <http://aws.amazon.com/verification>

Programming Languages: HTML, JavaScript, Java, Python, C#, PHP

Frameworks and Tools: **Laravel**, Rails, CSS, Bootstrap, Git, Ruby Gems, API, Git Bash, Heroku, GitHub, JQuery, Amazon, Netlify, Eclipse, IntelliJ IDEA, NetBeans, Xampp

Databases: MySQL, Amazon RDS, Amazon DynamoDB

JAVA PROJECTS & EDUCATION

- At Mott College we utilized Java applet in our front end of development with Dreamweaver.
- My Java education has provided me with the skills to install Java JDK from command line, Java Eclipse and IntelliJ IDEA, as well as to get projects to run and push to GitHub.
- My working knowledge includes Spring Framework, Maven and SOAP.
- Basic knowledge of Java has been obtained from Code Academy, Udemy, W3schools. Examples of my knowledge include the following: defining variables, operations, priorities, simple if, simple function, simple loop, one dimension array, polymorphism and creating a SQLite database.
- Currently developing a snake game that utilizes my name and an application for a client that sells handmade soap, both of which are in Java.
- Developed a Tic-Tac-Toe game in JavaFX. The code is available for viewing on my GitHub site.

PORTFOLIO & CURRENT PROJECTS

- **Laravel Frameworks:** Laravel form sending data to database and retrieving that data from database and putting on a webpage.
- **I'm A Zombie** is a 2D game developed using the **Unity** cross-platform game engine which also uses C# language. To develop this game, I formed a team of three people in which I led and functioned as the overall programmer.
<https://ymtony817.itch.io/im-a-zombie>
- **Naturally Coiled Hair Salon** is a site that I designed and developed for a client using Bootstrap, HTML, JavaScript, CSS, Ecommerce Web Store, GoDaddy to host and

- Netlify to deploy. www.naturallycoiledsalon.com
- Ecommerce website was developed using API and Ruby on GitHub.
- Twitter like site was developed website using Ruby on GitHub
- Personal website was developed using HTML and CSS. www.anthonysgamblejr.net
